09:00am **Welcome** (Jason Hall)  
*Welcome to Day 2 of the OpenWest Conference!*

09:15am **KEYNOTE: The Evolution of PHP as an Open Source Language** (Rasmus Lerdorf)  
*How PHP came to be*

09:45am **KEYNOTE: Thriving with open-source at scale** (Mark Callaghan)  
*I have been helping to keep large, busy and growing MySQL deployments happy for seven years. I was fortunate to have fun problems to solve, work with talented peers and start with a great product which has become much better in the past few years -- MySQL. I will describe what it took to keep MySQL in production from 2006 until now and make a few predictions on how people might talk about it 7 years from now.*

10:30am	Full Text-Search with SQLite (AJ ONeal)	Scaling from 2 to 6 (H Hatfield)	Managing time without a Project Manager (Cozette Stoddard)	Lean Client Side Web Applications using Angular, Bottle, and NoSQL (Samuel M Smith)	Memory Management Without Garbage Collection (Gavin Howard)	Programming with Persistent Compute Objects: A Post-Web Architecture (Phil Windley)	Removing Cron From The PHP Workflow (Dan Hunsaker)	Child themes and post format support (Mike Hansenm)	Ooey GUI Web (Craig Bertson)	hackCenter: Wireless Hacking - hands on (theTransistor and DC801)	Making Advanced Intrusion Detection Environment (AIDE) Awesome (Anthony Browness)
11:30am	MariaDB - the new M in LAMP? (Colin Charles)	Salt Stack: Going Beyond Configuration Management (Thomas S Hatch)	Discussing SEO and Web Trends with the CEO (Jenny Jessop)	Single Page Applications (Mac Newbold)	QEMU and command line virtualization (Mike Lovell)	Writing Applications At Cloud Scale (Matt Ryan)		The WordPress Developers Toolkit (Patrick Cox)	Creating CSS Styleguides that are living (Jared Daines)		Firewall Wizardry using Netfiler / Iptables (Lance Buttars)

12:30pm **Lunch**  
*Lunch break*

02:00pm	MySQL Q&A (Mark Callaghan)	Introduction to ZFS (Aaron Toponce)	Open source v. proprietary: Legal and strategic pros and cons for startups (Sara Jones)	Vector Graphics on the Web with Raphaël (Daniel Hanks)	Hardcore Google: Go, AngularJS, and App Engine (Joshua Marsh)	Using OpenStack In A Traditional Hosting Environment (Jun Park, Mike Wilson)	Power Up your PHP with a PaaS (Grant Shipley)	Getting Started with Drupal (Jared Smith)	Empowering your CSS with Preprocessing (Justin Carmony)	hackCenter: Wireless Hacking - hands on (theTransistor and DC801)	Protecting Your Linux Server Against Security Vulnerabilities (Craig Gardner)
03:00pm	What every web developer should know about database optimization (Steve Meyers)	Real-time infrastructure management with Salt (Seth House)	Where are the Women Coders? (Rachel Albrecht, Cody Henrichsen)	Using D3, Cubism, and WebSockets to Make Your Little Heart Go Pitter-Pat (Bret Palsson)	Are You A Wizard? Efficient Text Editing with Vim (Jamison Dance)	Deploying workloads in the Cloud with Ubuntu (Ben Howard)	Composer (Russell Ahlstrom)	I'm Using WordPress, Now What? Starter Edition (Thom Allen)	Build more with LESS CSS (Jake Smith)		Using shorewall for robust Linux firewalls (Doran Barton)
04:00pm		Writing Salt Modules (Joseph Hall)			Introduction to Software Craftmanship for Apprentices (Daniel Evans)	The Disruptive Nature of Open Source Cloud (Alan Clark)	Refactoring 101 (Adam Culp)	WordPress Cook Book (Velda Christensen)	Embrace Your Inner Designer (Josh Broton)
