Utah Open Source Conference 2007 The Convergence...

September 6-8, 2007

By, for and about Utah Open Source.

Join us at the first major event for the open source community in Utah! Whether you are a geek, CTO or both, this conference is for you. The Utah Open Source Conference is the first major gathering in Utah focused solely on bringing the open source community together, business, technology and community.

The Convergence..., this year's theme is about bringing the open source technology and communities to the businesses in Utah. Showing how technologies have improved, how open source communities can be beneficial to businesses and how businesses can leverage the technologies and community for better products, services and people. The conference is intended to focus on three main concepts; open source community growth, business adoption of open source technology and promoting open source technology from within Utah's boundaries.

The folks at Utah Open Source have been working hard for just over a year to help these goals become a reality. The conference is shaping up to be the premier open source Conference in the state. Currently, over 20 presentations and tutorial sessions are in place occurring over in 2 days, including a keynote by open source and free software advocate, Bruce Perens.

Learn more about open source and its benefits to our community as well as to the world. Learn more about what Utah's are doing for open source. Find out how your business can use open source to save time and money. There is something here for everyone and we'll for sure have some surprises up our sleeves too.

Location Information

Utah Open Source Conference 2007 will be held at the Open Source Technology Center (OSTC) at Novell.

Diamond Sponsors

Guru Labs is the premier multi-distribution Linux education provider. We empower people, develop educational tools, and contribute to Linux. We know more.

DirectPointe makes technology simple, manageable, and affordable by offering a complete computing solution with one point of payment, support, and accountability.

DirectPointe manages your technology so you can manage your business. As a growing business you need to focus your resources on staying competitive. We help you turn technology into a competitive advantage by providing enterprise level services for an affordable monthly fee.

Instead of working with multiple vendors to evaluate, acquire, deploy, and support technology, you have one reliable company to help with all aspects of your computing infrastructure. DirectPointe creates a centralized and standardized environment for your business, enabling you to realize economies of scale, and helping your business remain competitive in your market.

Providing the location for this year's conference, the Open Source Technology Center will encourage and support innovation in open source software technology. Initially, we will allocate 27,000 square feet of prime office space at our Provo, Utah campus for the Open Source Technology Center. Small open source

companies—just like yours—can move to the center and benefit from a fully equipped business infrastructure and extensive on-site resources.

KnowledgeBlue L.L.C. is a privately held Open Source Services company founded by several Fortune 500 executives and is based in Salt Lake City, Utah

Knowledge Blue's mission is to help grow your Company. First, we do this by providing a suite of integrated services to help reduce your overall cost structure - without any large up-front capital expenditure. This allows you to leverage your cash and investments in the areas that will excel your future growth. Second, we provide you an outsourced operational infrastructure, that grows as you grow, providing unlimited scalability for your Company, when you need it, on demand. Our whole business model is built around your future growth. If you grow we grow, so we

Diamond Sponsors

Open Source Technology Center
Sponsored by **Novell**.

Other Sponsors

assume a responsibility for your overall success.

Our focus is on small and medium businesses (SMB), including start-up and emerging Companies. We specialize in providing a suite of high value, outsourcing services that are economically attractive, and available to you on demand. We believe in taking an extra level of risk with smaller, emerging Companies in return for the opportunity of sharing your future growth – together.

Special Interest Groups

Utah Open Source Conference 2007 could not be successful without the help from the community Special Interest Groups. The focus of these groups is what makes Utah such a vibrant open source community.

Utah Open Source [Special Interest Groups \(SIGs\)](#)

Other Sponsors

Orchid Event Technologies is a complete meeting and event management solution that includes a comprehensive suite of tools, including Event Marketing, Web Brochures, Online Event Registration, Attendee Management, Housing Management, Unique Passkey Integration for event planners utilizing Passkey, Optional Activities, Financial Management, Quality Control, Financial Processing and Management, and Reporting, all in a single integrated solution.

Providing our hosting, NeverBlock is a smaller virtual private server hosting service.

BoFs? What are BoFs?

Well, if you have not heard of them, you have either been hiding under a rock or more likely never been to a major conference. The idea of a BoF (Birds of a Feather) get together is to get people of like minds together.

Its time for you to suggest a BoF as well. Have a look around the community and think of something you think others might also like to discuss during the Utah Open Source Conference.

Send those ideas to bofs@utos.org

Current Birds of a Feather (BoFs)

HOME GROUPS SCHEDULE SPEAKERS SESSIONS SPONSORS PRESENTATIONS EVENTS BOFS PARTICIPATE

Participation in the Utah Open Source Conference 2007 couldn't be easier. There are several ways you can participate in the conference:

Submit Your Paper

Submit your outline for a topic related to Open Source in Utah. Papers are currently being accepted. Please submit to participate@utos.org.

Example Outline:

Title: Leveraging Open Source for Billing Infrastructures
Keywords: Open Source, Billing, Accounting, Finance, Postgres, Perl
Audience: Businesses wishing to learn about a new open source billing system, Synopsis
Overview: Billing is a basic need of every business, but accounting is missing from most programmer's educations. Learn about available tools for the small business that have the right mix of accounting and geek.

Responses will be returned by July 1, 2007.

Final Submissions w/slides and outlines will be due August 15, 2007 for final review.

For information regarding whether we received your outline, ask herlo or Zelut via irc on freenode.net at #utos.

Join the Team

We currently have some open positions on our team listed at [our volunteer page](#). If you are interested in joining our team in one of those positions, please contact Clint Savage at clint@utos.org.

Other Participation

If you have an idea for participation that is not listed here, contact us, and let us know what your idea is. We welcome volunteer participation in whatever way it comes. After all, we are an open-source conference, and we want to conference to occur in as open a way as possible!

If you have any questions, please feel free to contact us. Either by our [Contact Us](#) page, or by the following:

Email

Christer Edwards (christer@utos.org) - Marketing and Advertising
Mike Morgan (mike@utos.org) - Sponsorship and Finance
Clint Savage (clint@utos.org) - General Questions and Administrative
Jason Hall (jayce@utos.org) - Conference Program and Planning

Diamond Sponsors

OSTC

Open Source Technology Center
Sponsored by **Novell**.

Other Sponsors

We look forward to your participation in our inaugural conference which is on track to become the premier Utah Technology event.
